Challenge #1:Goal

Objectives:

1. Prepare a one page documentation containing your goals and plan for your website based on your learning in w3school.

- **My vision for this website is to create a digital archive dedicated to preserving and immortalizing Martial Law in the Philippines. To serve as a historical repository, reminding future generations of the events that shaped our nation during this crucial time.**

- **I aim to create a website that is simple and brief enough to be understood by the majority of people who will visit my page. I am ensuring that content within my website is factual and accurate.**

2. Create a github repo project called "IntroToComputing-Challenges".

3. Push this in github the documentation in PDF format. The comment of your commit must be the title of this activity. For example "Challenge #1: Goal"
